Introduction:

Welcome to "your playbook to becoming a funded trader" If you require additional support you can contact me in the Financial Hideout Discord channel. You can click the hyperlink or find the invitation in my Instagram bio.

Additionally, for a beginner to advanced trading guide created to teach you how to become a profitable trader and escape the rat race, see my e-book using this hyperlink for a discount.

Otherwise, Enjoy.

Imagine this: You've spent months, maybe even years, learning the ins and outs of trading. You've honed your skills, developed strategies, and even seen some success on small accounts. But there's one thing holding you back from truly breaking through: Capital.

The truth is, no matter how sharp your trading skills are, without enough capital, scaling up to a level where you can consistently pull in five or six figures seems nearly impossible.

For many traders, the dream of going full-time, making enough to quit their 9-to-5, or even achieving that elusive six-figure income, feels just out of reach.

You know the strategies, you've done the work, but the lack of significant capital is a barrier that's hard to overcome.

This is where prop firms come into the picture. Prop firms offer traders like you and me the opportunity to trade with large amounts of capital without needing $1000's to start.

They've become the gateway for skilled traders to leap from small-time profits to making real life changing money... sometimes even six figures a year. But let's be clear: prop firms aren't a get-rich-quick scheme.

They're not a lottery ticket to wealth. Your ability to trade successfully, consistently, and with discipline is what will turn this opportunity into a life-changing Income stream.

In this guide i've partnered with FundedNext, to reveal the exact blueprint you can use to get funded and pass any prop firm challenge.

I'll walk you through the steps you need to take, the strategies you need to master, and the mindset you need to adopt to not only pass the challenges but to excel beyond them as a trader.

By the end, you'll understand how to position yourself to become a full-time trader, and potentially earning five figures a month.

Whether you're just starting out or you've been trading for years and feel stuck, this guide is designed to give you actionable insights that can change the trajectory of your trading journey.

It's time to take control, leverage your skills, and unlock the potential that trading with real capital can offer.

Let's dive into Chapter 1, where we'll explore what prop firms are and why they might just be the solution you've been looking for.

CHAPTER 1: PROP FIRMS 101

SAM SIDNEY X FUNDEDNEXT

If you've ever dreamed of trading with enough capital to make a serious impact on your earnings, but you're stuck with limited funds of your own, you're not alone.

Many traders face this exact problem including myself at one point, and it's a significant hurdle in reaching those high-income goals.

But I have a solution: prop firms are designed to bridge this gap and offer a path to achieving those dreams.

What is a Prop Firm?

A proprietary trading firm, often called a "prop firm," for simplicity is a company that provides traders with capital to trade financial markets.

Instead of using their own money, traders use the firm's funds, and in return, they share a portion of the profits with the firm, Normally it's an 80-95% split where you take the higher end and the firm gets 5-20%.

Think of it as an opportunity to trade with a much larger account than you could fund on your own, the only money you have to risk is the money you use to buy a challenge. And they start as low as $32 as seen on Fundednext.

You can get it even cheaper by tapping this hyperlink then entering "SAMSIDNEY" at the checkout.

	$5,000	$10,000	$25,000	$50,000	$100,000

How Do Prop Firms Work?

Here's a simple breakdown:

1) Application Process:

To start, you typically need to apply to the prop firm. This often involves demonstrating your trading skills through a series of tests or a "challenge account."

You can secure a discount with my prop firm of choice by tapping here.

2) Challenge Account:

This is a simulated trading environment where you prove your abilities under specific rules and conditions. For example, you might need to achieve a certain percentage gain within a set period while adhering to risk management rules.

3) Evaluation:

If you pass the challenge, the firm evaluates your performance. They're looking for consistency, risk management, and the ability to follow trading rules.

4) Funding:

Upon successful completion, you're offered a funded trading account. The firm provides you with capital to trade, and you keep a significant portion of the profits.

5) Profit Sharing:

The profits you make are split between you and the prop firm. The exact split varies by firm, but you typically keep a substantial portion, sometimes up to 95% of the
profits like FundedNext.

Why Prop Firms Matter:

1) Access to Larger Capital:

Prop firms give you the leverage to trade with significant capital. This means you can take larger positions, diversify your trades, and potentially earn more, without needing to risk your own money.

2) Reduced Financial Risk:

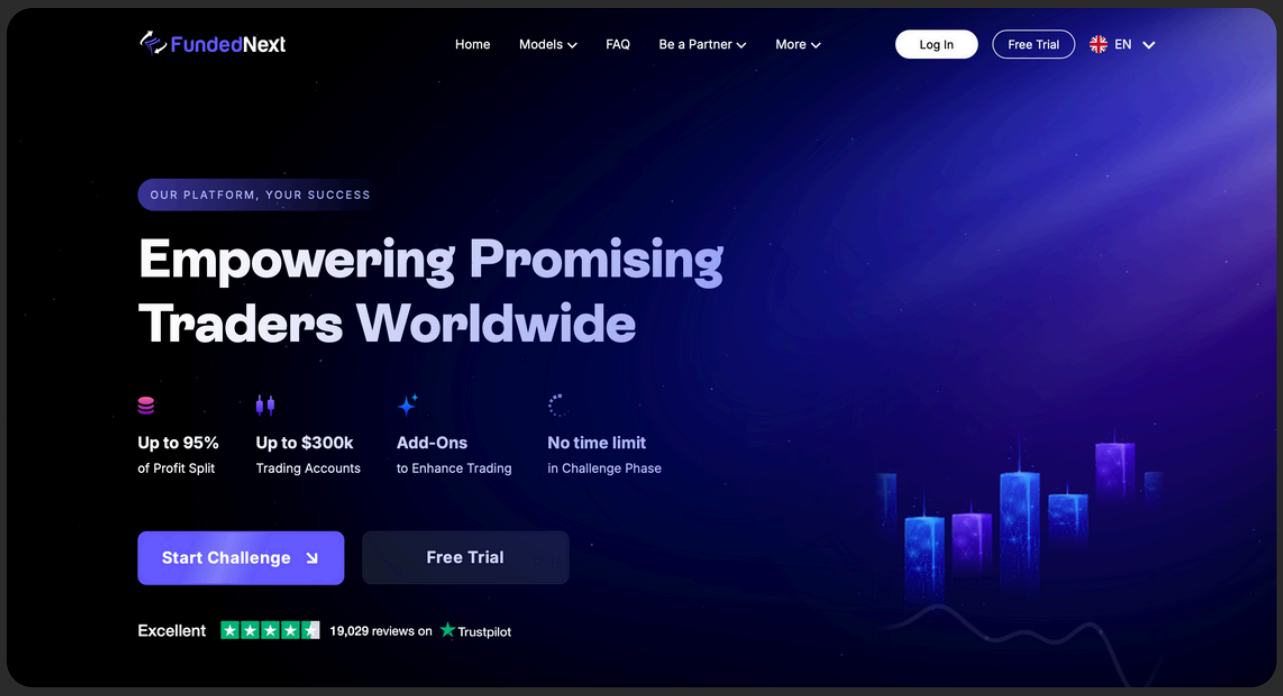

Trading with a prop firm means you're not risking your personal savings. This can reduce the emotional stress associated with trading and allow you to focus on your strategies. We'll get into some rules you need to follow in the next chapter.

3) Structured Environment:

Prop firms provide a structured environment with clear rules and guidelines. This can help you develop discipline and consistency in your trading approach.

4) Professional Growth:

Being part of a prop firm can also offer access to advanced trading tools, educational resources, and a network of professional traders, or you can tap here and join my prop firm of choice.

Challenge Accounts:

The Gateway to Funding:

A challenge account is your first step in this process. It's designed to simulate real trading conditions and assess your ability to handle significant capital.

Here's what you need to know about them:

1) Objective:

The main goal is to show that you can trade profitably while adhering to risk management rules. This usually involves achieving a specific return on the simulated account within a set timeframe, although most propfirms don't have time limits now.

2) Rules:

Each prop firm has its own set of rules, such as maximum drawdowns, minimum trading volume, or specific trading strategies. Understanding and following these rules is crucial for passing the challenge so take your time to read the small print.

3) Evaluation Criteria:

Firms look for consistency, risk management, and adherence to trading rules. They want to see that you can make profits without taking excessive risks. This means yoloing a trade will only have you failing a challenge.

Is a Prop Firm Right for You?

Prop firms can be an excellent solution if you have trading skills but lack sufficient capital. They provide an opportunity to trade with more significant amounts, potentially leading to higher earnings, without risking your own money.

However, it's important to understand that trading with a prop firm still requires discipline, risk management, and a solid trading strategy.

It's not a shortcut to wealth, but a platform to help skilled traders reach their full potential.

Prop Firms provide an opportunity to trade with significant capital.

5% Profit on a $100 account is $5

5% profit on a $1000 account is $50

5% Profit on a $10,000 account is $500

5% profit on a $100,000 account is $5000

The secret is not chasing bigger returns. but securing more capital.

In the next chapter, we'll delve into the specific rules and strategies needed to pass prop firm funding challenges.

What you'll learn:

You'll learn how to approach these challenges effectively and maximize your chances of success.

If you're ready to turn your trading skills into a funded opportunity? Turn the page!

CHAPTER 2: ESSENTIAL RULES

SAM SIDNEY X FUNDEDNEXT

Essential Rules for Success:

If you've made it this far, you're likely serious about taking your trading to the next level. You understand that prop firms offer a unique opportunity to trade with substantial capital, but you also know that passing a prop firm challenge is no walk in the park.

This chapter is all about equipping you with actionable steps that will increase your chances of passing a challenge and getting funded. Let's dive into the process, step by step.

Step 1: Develop and Test a Profitable Trading System:

The foundation of any successful trading journey is a solid, profitable trading system.

This system is your blueprint, the set of rules and strategies you'll rely on to make trading decisions. If you don't already have a proven system, now is the time to develop one.

Finding a Strategy: Start by selecting a trading strategy that aligns with your trading style and goals. You can learn strategies from various sources—YouTube tutorials, online forums, trading courses or my ebook.

While free resources are available, investing in a paid course often yields better results. Paid education typically requires a financial commitment, which can motivate you to put in more effort and truly understanding the material.

Do what works best for your situation.

Backtesting: Once you have a strategy, it's crucial to backtest it. Backtesting involves applying your strategy to historical market data to see how it would have performed in the past.

This step can be tedious, but it's what separates successful funded traders from those who fail challenges.

Aim to gather at least one year of data, focusing on 2-3 consecutively profitable months. This process might take 3-5 days of focused work, but it's essential for building confidence in your strategy.

During backtesting, track these key metrics in a trading journal:

Total Drawdown: The maximum loss your strategy might incur.

Profitability: Determine how profitable your strategy is.

Odds of Passing: Assess your chances of passing a prop firm challenge with this strategy.

Weak Points: Identify any weaknesses or areas for improvement in your strategy.

Confidence Level: Gauge how confident you feel using this strategy in a live trading environment.

Bonus Tip:

Aim to achieve a 10% return in your backtesting phase. Most prop firms require an 8% profit target for Phase 1 of their challenges, so consistently hitting 10% will give you a buffer and boost your confidence when it comes to taking a challenge.

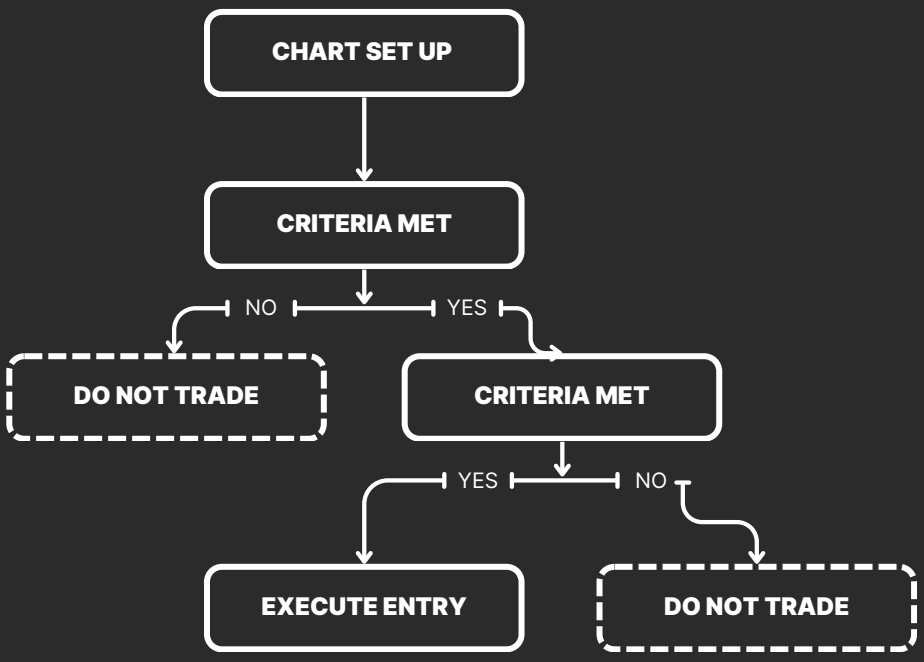

Already have a strategy that works?

You're probably ready to take the challenge of becoming a funded trader. Tap this hyperlink link then use code "SAMSIDNEY" to secure yourself a discount.

Step 2: Create a Detailed Trading Plan:

Having a detailed trading plan is not optional—it's essential.

Your trading plan should provide a **mechanical approach** to trading the market with a **rinse and repeat criteria** that tells you **what to do** in every scenario to help you approach trading more consistently. For example:

What to Include in Your Trading Plan:

Trading Pairs: Clearly define which currency pairs or assets you'll trade.

Entry and Exit Criteria: Specify the conditions under which you'll enter and exit trades.

Risk Management Rules: Outline your risk parameters, including position sizing and stop-loss levels.

Scenario Planning: Consider different market scenarios and how you'll respond to each. This helps prevent emotional decision-making during the challenge.

Once you've collected sufficient data from backtesting and have validated your trading plan, it's crucial to stick to it.

The plan is there to guide you, so resist the temptation to deviate from it, even if the market throws unexpected situations your way.

Step 3: Master Risk Management:

Risk management is arguably the most critical component of passing a prop firm challenge.

Prop firms set strict drawdown limits to ensure their capital is protected, and your ability to manage risk within these limits is what they're assessing.

Understanding Drawdown Limits: Most prop firms have a daily drawdown limit, typically around 3-4%.

This means that if your account drops by this percentage in a single day, you fail the challenge. To stay within these limits, consider adopting a more conservative risk approach.

Risk per Trade:

A good rule of thumb is to risk no more than 1.5% of your account on any single day. To account for slippage or unexpected market movements, you might start with a lower risk of 0.5% per trade and gradually scale up to 1.5% as you create a buffer on the capital.

Take Your Time:

Many prop firms, including FundedNext, don't impose time limits for passing the challenge. This means there's no rush. Focus on taking the highest quality trades that align with your strategy and trading plan. **Quality over quantity is the key here.**

RISK REWARD CHEATSHEET

Risk/Reward ↓ \ Win Rate →	20%	30%	40%	50%	60%
1:1	Not profitable	Not profitable	Not profitable	Break even	Profitable
1:2	Not profitable	Not profitable	Profitable	Profitable	Profitable
1:3	Not profitable	Profitable	Profitable	Profitable	Profitable
1:4	Break even	Profitable	Profitable	Profitable	Profitable
1:5	Profitable	Profitable	Profitable	Profitable	Profitable

Step 4: Strengthen Your Trading Psychology:

Trading psychology is the backbone of successful trading, especially in high-pressure situations like a prop firm challenge. Even if you have a solid trading system and a detailed plan, poor trading psychology can derail your progress.

Psychology Tips:

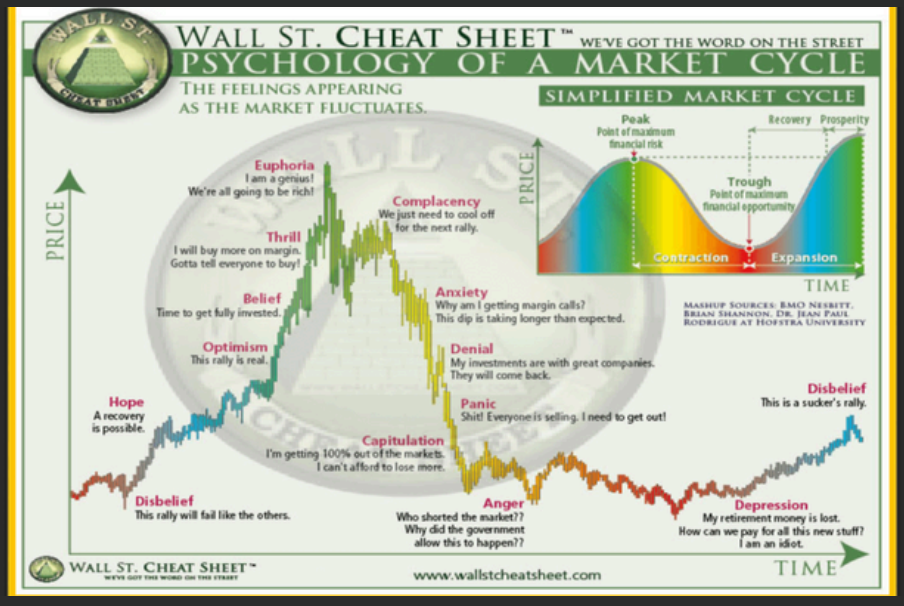

Greed → Sell: When you find yourself holding onto a trade purely out of greed, consider taking profits. It's better to lock in gains than to watch them evaporate.

FOMO (Fear of Missing Out) → Do Not Trade: If you feel the urge to jump into a trade because you're afraid of missing out, resist. FOMO leads to impulsive decisions, which rarely end well.

Anger → Step Back and Evaluate: Anger after a loss can cloud your judgment. When you feel this emotion creeping in, step away from the screen and reassess your strategy.

Stress → Lower Capital at Risk: If trading becomes too stressful, reduce your position sizes/risk %. This will lower the stakes and help you regain control over your emotions.

Confidence → Practice: Confidence comes from preparation. The more you practice and refine your strategy, the more confident you'll become in executing it.

Pro Tips for Passing Prop Firm Challenges:

As you prepare for your challenge, keep these pro tips in mind:

1) Start Small:

If you've never taken a prop firm challenge before, start with a smaller account. Large numbers can cause psychological stress. Use the profits from smaller accounts to gradually scale up and take on larger challenges.

You can unlock a $5000 account today for as little as $29.44 by tapping this hyperlink and entering code "SAMSIDNEY" at the checkout.

"Start Small, Gain Big"

Once you pass this account consider using the payouts to purchase larger challenge accounts to help scale your trading income.

2) Master Risk Management:

Proper risk management isn't just about passing the challenge—it's about retaining your funded account once you have it. Focus on protecting your capital at all costs. I'll include a short risk management plan for passing fundednext challenge accounts at the end of this guide.

3) Take Your Time:

There's no rush to pass the challenge. Choose a firm like FundedNext, which offers unlimited trading days, so you can take your time and focus on quality trades.

4) Take a Break After Passing Each Phase:

It's tempting to keep trading after passing a challenge phase, but excitement can lead to mistakes. Take a short break, clear your mind, and return to the markets with a rational mindset.

5) Build Your Own Account:

As you start receiving payouts from your prop firm account, consider using some of that money to fund your own personal trading account.

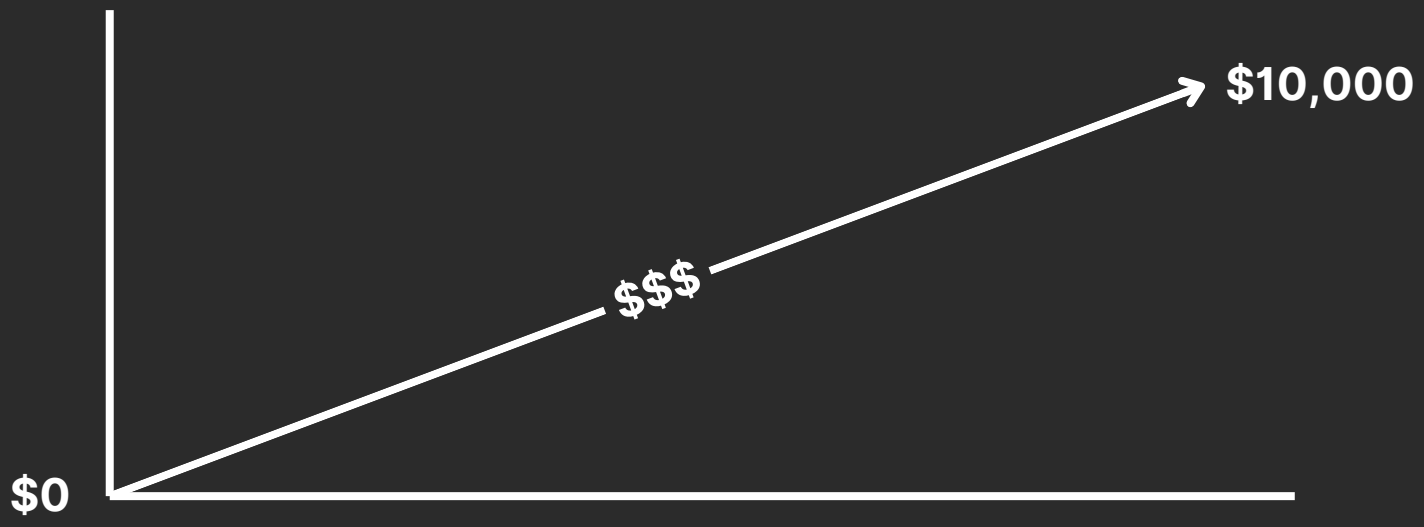

This will give you more freedom and allow you to diversify your trading capital.

By following these steps and tips, you'll be well-prepared to take on a prop firm challenge and secure the funding you need to take your trading to the next level.

Remember, it's not just about passing the challenge, it's about becoming the kind of trader who can consistently perform at a high level.

In the next chapter, we'll explore the formula for making five figures a month as a funded trader, building on everything you've learned so far.

Are you ready to see what your future might be like as a funded trader? Let's move forward!

CHAPTER 3: 5 FIGURE FORMULAS

SAM SIDNEY X FUNDEDNEXT

You Received a Payout of $10,000:

Imagine waking up to a $10,000 payout in your account. You've worked hard, honed your skills, and now, the rewards are starting to roll in.

This isn't just a dream—it's a very real possibility when you're trading with the right strategy, mindset, and capital. Becoming a six-figure trader is within your reach, but it requires a plan and disciplined execution.

In this chapter, we're going to break down the formula for consistently achieving five-figure months, whether you're trading forex, gold, or stocks.

The Formula for 5-Figure Months:

Achieving five-figure months as a trader isn't about luck; it's about following a structured approach that maximizes your chances of success.

Turn the page to see how you can do it:

Forex Trading Formula:

1) Defining a Trading Period:

For forex trading, define your trading period as a month. This allows you to measure your progress and adjust your strategy based on market conditions and your performance.

2) Daily Profit Target:

Set a daily profit target that contributes to your overall monthly goal. For example, if you aim to make $10,000 in a month, your daily target could be $500, assuming you trade 20 days in a month.

3) Risk Management & Position Sizing:

Risk management is critical. Let's say you decide to risk 1% of your account per trade. If you're trading a $100,000 funded account, this means you're risking $1,000 per trade.

4) Risk-Reward Ratio:

Aim for a risk-reward ratio of at least 1:3. This means that for every $1 you risk, you're aiming to make $3. If you risk $1,000 per trade, your goal is to make $3,000 per successful trade.

5) Calculating Position Size:

Use a position size calculator to determine how many lots to trade based on your risk per trade and stop-loss level. For example, if your stop-loss is 50 pips, and you're risking $1,000, you would trade 2 standard lots.

6) Risk per Trade:

As mentioned, risk no more than 1% of your account per trade. This keeps your losses manageable and ensures that a few losing trades won't wipe out your account.

7) Example Trade:
Let's say you're trading EUR/USD. You identify a trade setup with a 50-pip stop-loss and a 150-pip take-profit level. You enter the trade with 2 standard lots. If the trade hits your take-profit, you've made $3,000.

8) Daily Trading Goal:
If your goal is $500 a day, you only need one successful trade every 6 trading days with this setup to reach $10,000 a month. This highlights the importance of quality over quantity in your trades.

Gold Trading Formula:

1. Defining a Trading Period:
Like forex, define your trading period as a month. Gold tends to be more volatile, so this period will allow you to ride out fluctuations while focusing on your monthly target.

2. Daily Profit Target:
With gold's volatility, your daily profit target might be higher. Let's set it at $1,000 to reach $20,000 a month, allowing room for higher gains and potential losses.

3. Risk Management & Position Sizing:
Given gold's volatility, you might decide to risk 0.5% of your account per trade. On a $100,000 account, this would mean risking $500 per trade.

4. Risk-Reward Ratio:
For gold, aim for a risk-reward ratio of 1:4 or higher, due to its potential for larger swings. If you risk $500, your target would be $2,000 per trade.

5. Calculating Position Size:
Calculate your position size based on your stop-loss level. If you set a 10-point stop-loss on a gold trade, you might trade 5 lots, considering the volatility.

6. Risk per Trade
Stick to risking 0.5% per trade. This conservative approach helps protect your capital in a market as volatile as gold.

7. Example Trade
You find a setup on gold with a 10-point stop-loss and a 40-point take-profit. Trading 5 lots, if the trade hits your target, you've made $2,000.

8. Daily Trading Goal
With a $1,000 daily goal, a single successful trade could cover two days' worth of profits. Even if you lose a trade, you're still within your risk management rules, making it easier to recover and stay on track for your monthly goal.

Stocks Trading Formula

1) Defining a Trading Period:
For stocks, particularly if you're swing trading, you might define your trading period in terms of weeks or months. However, for our goal, we'll focus on a monthly period.

2) Daily Profit Target:
In stocks, let's set a more modest daily target of $300, aiming for $6,000 a month. Given the variability in stock price movements, this allows for more flexibility in
your trading approach.

3) Risk Management & Position Sizing:
For stocks, risk 1% of your account per trade. On a $100,000 account, this means you're risking $1,000 per trade.

4) Risk-Reward Ratio:
Stocks can be more predictable, so a 1:2 risk-reward ratio is reasonable. If you're risking $1,000, aim to make $2,000 per trade.

5) Calculating Position Size:
Your position size will depend on the stock price and your stop-loss level. If you're trading a stock priced at $50 with a $2 stop-loss, you might buy 500 shares.

6) Risk per Trade:
Stick to 1% risk per trade. This allows for steady growth and protects your capital against large drawdowns.

7) Example Trade:
Suppose you buy 500 shares of a stock at $50, with a $2 stop-loss and a $4 take-profit. If the trade is successful, you've made $2,000.

8) Daily Trading Goal:
With a $300 daily goal, you're aiming for consistent, smaller profits. In this scenario, one winning trade could cover several days' goals, giving you breathing room in case of losses.

Putting It All Together:

Regardless of the market you're trading: Forex, gold, or stocks, the formula remains the same: consistent, disciplined trading with a focus on risk management and high-quality setups.

Achieving five-figure months is not about chasing profits or taking unnecessary risks. It's about following a plan, managing your risk, and letting the market work in your favor.

Your goal is to build consistent, repeatable results that lead to significant monthly earnings. Whether it's a $10,000 payout or more, the path to becoming a six-figure trader starts with the disciplined application of these principles.

In the next chapter, we'll summarize everything you've learned so far and outline the steps you can take right now to start your journey toward becoming a successful, funded trader.

Ready to take the leap? Let's move forward!

CHAPTER 4: GETTING FUNDED

SAM SIDNEY X FUNDEDNEXT

Becoming a 6 figure trader:

You've made it through the guide, and by now, you should have a clear understanding of what it takes to succeed with a prop firm challenge.

The journey from being a retail trader to becoming a funded trader capable of earning five figures a month is challenging but achievable with the right mindset, strategy, and preparation.

Let's recap the key points and give you a practical checklist to follow as you embark on your prop firm challenge.

Summary

Understanding Prop Firms: Prop firms provide traders with the opportunity to trade large amounts of capital without risking their own money. By passing a challenge, you can access this capital and potentially make significant profits.

1) Steps to Prepare for a Challenge:

- [ ] Develop and backtest a profitable trading system.
- [ ] Create a detailed trading plan to guide your decisions.
- [ ] Master risk management to protect your account from large drawdowns.
- [ ] Strengthen your trading psychology to stay disciplined and emotionally balanced.

2) Formula for Making Five Figures a Month:

- [ ] Set realistic daily profit targets and adhere to a defined trading period.
- [ ] Use risk management to determine position sizing and protect your capital.
- [ ] Aim for high-risk-reward setups to maximize your profitability. (1:2 - 1:5)
- [ ] Stay consistent and disciplined in your trading approach.

Checklist for Passing Your Prop Firm Challenge:

Use this checklist as a guide to ensure you're fully prepared for your prop firm challenge:

3) Trading System:

- [ ] Have you selected a trading strategy that aligns with your goals?
- [ ] Have you backtested your strategy with at least a year's worth of data?
- [ ] Have you achieved at least 2-3 consecutively profitable months in your backtesting?

4) Trading Plan:

- [ ] Have you created a detailed trading plan that outlines your strategy, risk management, and scenarios?
- [ ] Do you have clear entry and exit criteria for your trades?
- [ ] Have you committed to following your plan without deviation during the challenge?

5) Risk Management:

- [ ] Have you determined your maximum daily risk and risk per trade?
- [ ] Are you using a conservative approach to protect your account from drawdowns?
- [ ] Have you calculated your position sizes based on your risk management rules?

6) Trading Psychology:

- [ ] Are you prepared to handle emotions like greed, fear, and stress while trading?
- [ ] Do you have strategies in place to maintain discipline and avoid impulsive trades?

7) Preparation:

- [ ] Have you chosen a prop firm with favorable conditions, like unlimited trading days (e.g., FundedNext)?
- [ ] Are you starting with a smaller account to minimize psychological pressure?
- [ ] Have you planned breaks after passing each phase to clear your mind and stay focused?

8) Execution:

- [ ] Are you ready to execute your plan with precision and patience?
- [ ] Do you have a clear daily trading goal that aligns with your monthly profit target?
- [ ] Are you committed to the process, understanding that success is a marathon, not a sprint?

By following this checklist and applying the strategies you've learned, you'll be well-equipped to tackle your prop firm challenge and move closer to becoming a six-figure trader.

Remember, the key to success is consistency, discipline, and the ability to adapt to market conditions. Now it's time to take action and put everything you've learned into practice.

You've got this!

Oh and before I forget... I've included a bonus risk management plan for passing FundedNext challenge accounts on the next page. Enjoy.

Step by Step Risk Management Checklist to pass FundedNext Challenge Accounts:

- [ ] **Risk 0.5% per Trade to Start:**

Only risk 0.5% of the account total per trade until you build a buffer of 2% on the account.
Example: If you have a $25,000 account, risk 0.5% per trade, which is $125. Keep risking 0.5% per trade until the account reaches $25,500.

- [ ] **Increase Risk to 1% After Buffer:**

Once you have a 2% buffer, increase your risk to 1% per trade.
Example: For a $25,500 account, 1% risk per trade is $255.

- [ ] **Cut Risk in Half After 2 Losses:**

If you lose two trades in a row, cut your risk in half.
Example: If you're risking 1% ($255), drop it to 0.5% ($127.50) after two losses.

- [ ] **Stick to a 1.5% Daily Drawdown Limit:**

Don’t risk more than 1.5% of your account in a single day. This ensures you don’t hit the firm’s maximum daily loss limit.

- [ ] **Maintain a 3% Weekly Drawdown Limit:**

Your total weekly risk should never exceed 3% of your account.

- [ ] **Minimum 1:2 Risk-Reward Ratio:**

Always aim for at least a 1:2 risk-reward ratio. This means for every dollar you risk, aim to make at least two dollars.

- [ ] **Take 80% Profit at 2R:**

Once you hit a 2R target (twice your risk), take 80% of your profit, go break even and leave the remaining 20% as a “runner” to capture additional gains.

- [ ] **Limit Yourself to 2 Trades per Day:**

Don’t take more than two trades per day. This reduces the risk of overtrading and emotional mistakes.

Their customer service is impeccable

Their customer service is impeccable. 10 stars to Roger and Ania who were patient enough and ensured my withdrawal was smooth sailing. First withdrawal with Funded next many more to come.

I have traded with many prop firms but...

I have traded with many prop firms but Fundednext is just miles above all of them. Particularly, their support team is so amazing and always responsive. Why trade with other firms when we have Fundednext.

Last week I passed the test

Last week I passed the test, my kyc was verified and approved and now I am trading with my live account. All the processes were done very fast and the customer service is great. I have a very good positive experience.

Smooth transition

Passed my first phase and immediately got phase 2 challenge, journey great so far... Thumbs up for MT5 platform😇
